Re: MNG Client Welcome Letter

Dear Valued Client:

Medical Neurogenetics Laboratories (MNG) is pleased to announce that we have been acquired by Laboratory Corporation of America® Holdings (LabCorp®), a leading global life sciences company. We will operate as a wholly owned subsidiary of LabCorp and continue to provide you with the neurogenetic services you have come to rely on. In addition to MNG testing, you and your patients will have access to LabCorp's comprehensive test menu, national network of primary and specialty laboratories, and industry-leading expertise in diagnostic testing.

LabCorp is committed to continuing MNG's legacy of providing physicians and patients with high-quality laboratory services. LabCorp's services include nearly 5000 routine, specialty, and genetic tests, an advanced courier system deploying specialized logistics, convenient patient service center (PSC) access for patients, and enhanced IT and data analytics for physicians. Many of your core MNG services will be enhanced and supported by many of the same friendly faces.

Additionally, LabCorp offers you and your patients the opportunity to participate in clinical studies through our Covance Drug Development business, which helps advance treatment of complex diseases and speed the delivery of new treatments to patients.

A MNG representative will soon contact you and your staff to ask about your clinical needs. We look forward to serving you and your patients for many years to come.

Sincerely,

Keith Hyland
Executive Vice President
MNG Laboratories

Peter L. Nagy, MD, PhD
Chief Medical Officer
MNG Laboratories

Mindy Nye, PhD, MT(ASCP), D(ABMM)
General Manager, MNG Laboratories;
Vice President & Laboratory Director,
Center for Esoteric Testing, LabCorp
